

MIGUEL A. MUÑOZ-LABOY

CURRICULUM VITAE

EDUCATION

- Columbia University, Doctor of Public Health (DrPH), Sociomedical sciences, 2001.
- University of Connecticut, Masters of Public Health (MPH), International health, 1998.
- University of Puerto Rico, Bachelors in Science (BS), Agriculture, 1996.

TRAINEESHIP

- National Institute of Alcohol Abuse and Alcoholism, *Alcohol and Other Drugs Education Program (ADEP) for social work faculty*, Graduate School of Social Work, University of Denver, 2018.
- National Institute of Mental Health Postdoctoral Fellowship (T32 MH 19139) with the HIV Center for Clinical and Behavioral Studies, New York State Psychiatric Institute and Department of Psychiatry at Columbia University, 2003.

ACADEMIC APPOINTMENTS

- 2021-** *Associate Professor*, School of Social Welfare, Stony Brook University: State University of New York (SUNY), Stony Brook, NY
- 2019- 2020** *Associate Medical Professor*, Department of Community Health and Social Medicine, School of Medicine, City University of New York, NY
- 2012- 2019** *Associate Professor*, School of Social Work at Temple University, Philadelphia, PA
- 2009-2012** *Associate Professor of Sociomedical Sciences*, Mailman School of Public Health (MSPH) at Columbia University, New York, NY
- 2005-2009** *Assistant Professor*, MSPH, Columbia University, New York, NY
- 2003-2005** *Associate Research Scientist*, MSPH, Columbia University, New York, NY

FELLOWSHIP AND GRANT SUPPORT

07/01/2018 – 05/31/2020

Examining the Impact of Medical Legal Partnerships in Improving Outcomes on the HIV Care Continuum

In theory, medical-legal partnerships (MLPs) have great potential for addressing outcomes in the HIV care continuum, given that such programs have been found to increase service utilization and addressing mental health among people with chronic conditions. Although there are MLPs currently working with PLWH, there has been no study documenting MLPs' impact in this community. The aims of this developmental research project are: (1) To identify existing best practices among current MLPs that can be tested, replicated and scaled-up as evidence-based practices for addressing social determinants of health and improving outcomes in the HIV care continuum; (2) To assess the effects of the identified MLP practices on: a) appropriately addressing the legal problems of PLWH, b) reducing the legally-related psychosocial burdens, and, c) increasing positive movement in the HIV care continuum (including linkage and retention in care and viral load suppression); (3) To develop an MLP-comprehensive HIV care diffusion model and its benchmarks of success to achieve positive movement in the HIV care continuum.

Clinica Bienestar: An HIV treatment intervention for Latinos in Philadelphia

The Clinica Bienestar goals are: a) to identify HIV+ persons of Puerto Rican origin who are unaware of their status and/or not engaged in care; b) Engage them in care in a culturally appropriate and scalable model that will create a sustainable model for integrated care; c) provide HIV treatment consistent with generally accepted benchmarks including viral load, appropriate prescribing, immune recovery and the adequate treatment of co-morbidities and complications of HIV/AIDS d) Successfully address contextual/cultural barriers that limit engagement and retention in care; and e) Evaluate this model in the local context and in collaboration with the national Special Projects of National Significance (SPNS).

10/2009-07/2014

Gender, Power and Latino Men's HIV Risk

The aims of this project were: 1) To describe the mechanisms by which gender and power inequalities create HIV risk in the lives of bisexual Latino men and how these men respond to these conditions of risk and vulnerability; 2) To conduct an assessment of the capacities and limitations of the local HIV prevention infrastructure, with a particular emphasis on exploring how macro-societal perceptions of Latino bisexuality and masculinity create or limit access to HIV prevention and treatment services for bisexual Latino men in the New York Metropolitan Area; and 3) On the basis of research findings, to design a contextually-relevant, evidence-based, theoretically-grounded intervention to reduce HIV risk among bisexual Latino men using the Intervention Mapping approach.

Role: Principal Investigator

NIMH (Muñoz-Laboy & Guilamo-Ramos)
1RC1MH088636-01- Challenge Grant

09/2009-08/2011

Network Determinants of Sexual Risk, Alcohol and Marijuana Binge Use among Formerly Incarcerated Latino Men (FILM)

The goal of this project is to examine the role of familial and social networks among FILM in order to develop the foundation for a network-based intervention to reduce HIV among FILM.

Role: Principal Investigator

NICHD (Hirsch)
1R24HD056691-01

09/2007-07/2012

Social Science Training and Research Department of Sociomedical Sciences (SMS) - Hanoi Medical University (HMU) Partnership

The goal of this project is to create a national center of excellence in social science approaches to the study of HIV prevention, treatment and care in Vietnam. This project provides training in the design and implementation of policy-relevant social science research, hands-on research opportunities for trainees in three pilot studies, and contributes to the institutional development of Hanoi Medical University's Department of Social Medicine.

Role: Co-Investigator (Director of Subproject on Masculinity and Family in Vietnam)

NIMH (Ehrhardt)
P30MH43520

02/2008-02/2012

HIV Center for Clinical and Behavioral Studies - Global Partnership Core

This core focuses on HIV prevention science among neglected populations at risk for HIV infection, with a commitment to innovative research based on new scientific approaches to prevention that emphasize sexual risk in the broader context of gender, ethnicity, and culture.

Role: Co-Investigator

NICHD (Parker)
1R01HD050118-01

05/2005-04/2010

Religious Responses to HIV/AIDS in Brazil

This study focused on examining the roles played by religious organizations and movements in the Brazilian response to AIDS – in particular, how their actions contributed to the development and implementation of a Brazilian model for addressing the epidemic.

Role: Co-Principal Investigator

NIAAA (Balan)
R21AA18075-01

09/2008-08/2010

HIV-Prevention Intervention Targets in High-Risk Alcohol Venues in Argentina

The goals of this project were to identify factors that contribute to alcohol use and high-risk sexual behavior in venues and identify HIV risk reduction possibilities in the venues and how they can be targeted by interventions.

Role: Co- Investigator

The Ford Foundation (Parker) 06/2002-02/2010

Sexuality Policy Watch

The aim of this project was to promote more effective linkages between local and regional activities and create a forum to stimulate global policy debate related to sexuality, sexual health, and sexual rights.

Role: Co-Principal Investigator

NIMH (Caton) 06/2005-07/2009

P30MH071430-01A1

Columbia Center for Homelessness Prevention Studies

The goal of this project was to prevent chronic homelessness among people with mental illness. Preventive interventions were developed for high-risk populations to enable individuals living with mental illness to retain safe, adequate, and affordable housing throughout the lifespan, therefore enhancing their ability to regain valued social roles and be included fully in the life of the community.

Role: Co-Investigator

NICHD (Muñoz-Laboy) 03/2007-09/2008

1R03HD055107-01

Ethnography of Men who have Sex with Male-to-Female Transgender Partners

This study focused on exploring the sexual culture and risk practices of men who have sex with male-to-female transgender partners in New York City.

Role: Principal Investigator

Ford Foundation (Muñoz-Laboy) 07/2006-06/2008

Masculinity, Sexual Culture and Cultural Production among Urban Youth in the U.S.

This project sought to respond to the silences in the available record of research findings on sexual cultures and sexual health among young people in communities of color in the urban United States by focusing systematic research attention on the social production of masculinities and male sexualities among urban youth in communities of color.

Role: Principal Investigator

University of Natal/NICHD (Preston-Whyte) 06/2002-08/2008

5R24HD043554-03

Partnerships for HIV/AIDS Research in KwaZulu-Natal

The aims of the project were to facilitate and foster social science research and training in the field of HIV/AIDS and promote the development of sustained and mutually informative multidisciplinary interaction between the social and biomedical scientists seeking solutions to the epidemic among African populations.

Role: Co-Investigator of the subcontract

NICHD (Muñoz-Laboy) 08/2005-06/2007

3R01HD041724-04S1

Minority Supplement: Investigator Developing Independent Research Career

Sub-study: The Social Context and Organization of Sexual Risk among Labor Mexican Immigrants.

Parent Study: Love, Marriage and HIV: A Multisite Study of Gender and HIV Risk (1R01HD041724-01A1;

PI: J. Hirsch)

Role: Principal Investigator of Supplement

Columbia University Professional Development Funds (Muñoz-Laboy) 01/2007-12/2007

Power inequalities and the Sexual Health of Bisexual Latino Youth

The aim of this project was to examine how power and gender inequalities shape sexual risks of bisexual teenage Latinos in New York City.

Role: Principal Investigator

Molly Lou Foundation (Muñoz-Laboy)

02/2005-06/2007

Healthy Monday Campaign: A Demonstration Project

The aim of this project was to launch and assess the feasibility of a social marketing concept for health promotion, making Mondays a designated day for promoting healthy behaviors.

Role: Principal Investigator

The Ford Foundation (Parker)

06/2002-07/2006

Sexuality, Culture, & Society: Building a Foundation for Sexuality

Research & Training in the 21st Century

The aim of this project was to contribute to the development of social science research and training in the field of sexuality with a prominent role in building this field both nationally and internationally.

Role: Co-Principal Investigator

Bronx AIDS Services/HRSA (Richards)

09/2004-08/2006

SPNS1H9HA03891-01-00

SPNS Research Grant on Young Men who have Sex with Men (YMSM)

This project consisted of conducting youth-action research, including ethnographic observations of YMSM social and sexual networks to increase access to HIV care for HIV positive YMSM.

Role: Program Evaluator

The Ford Foundation (Parker)

12/2001-06/2003

The Brazilian Response to HIV/AIDS

The aim of this project was to analyze the components and to assess the transferability of the Brazilian response to the HIV/AIDS epidemic.

Role: Co-Principal Investigator

NIMH (Ehrhardt)

07/2001-06/2003

T32MH19139 Training Grant

HIV Center for Clinical and Behavioral Studies

This postdoctoral research training program provides intensive training in human sexuality research as applied to HIV prevention and HIV-related health interventions. The major components of our program are academic course work, the development of research and professional skills, and the conduct of independent research.

Role: Postdoctoral Fellowship

- Society for Applied Anthropology (SFAA), 1997 – 1999

RESEARCH AND LEADERSHIP EXPERIENCE

- 2015 - 2017** *Technical Advisor*, Creating opportunities through mentorship, parental involvement, and safe spaces (COMPASS) program: Multi-country intervention study to protect girls from violence in humanitarian settings, International Rescue Committee Forced Migration Program, Department of Population and Family Health, Mailman School of Public Health at Columbia University, New York, NY
- 2011 – 2012** *Associate Director*, Center for the Study of Politics, Culture and Health, Mailman School of Public Health at Columbia University, New York, NY
- 2006 – 2011** *Director*, Doctor in Public Health (DrPH) Program in Sociomedical Sciences, Mailman School of Public Health at Columbia University, New York, NY
- 2006 – 2009** *Deputy Chair for Planning of Academic Programs*, Department of Sociomedical Sciences, Mailman School of Public Health at Columbia University, New York, NY
- 2003 – 2006** *Director*, Health Promotion MPH Program, Mailman School of Public Health at Columbia University, New York, NY
- 2006 – 2008** *Director*, Global Health MPH Program in Sociomedical Sciences, Mailman School of Public Health at Columbia University, New York, NY
- 2004 – 2008** *Director*, Community Scholars Fellowship Program, Mailman School of Public Health at Columbia University, New York, NY
- 1998 – 2001** *Field Researcher*, Epidemiology Community Psychiatry (ECP), Department of Psychiatry at Columbia University, New York, NY
- 05-08/1998** *Ethnographer*, Division Child and Health Development, World Health Organization, Project: Manual to Development of Community Support Systems for the Integrated Management of Childhood Illness Program, Hidalgo, Mexico
- 05-08/1997** *Ethnographer*, Centre for Interdisciplinary Community Health Studies at the University of Peradeniya, Kandy, Sri Lanka
- 1996-1998** *Research Assistant*, Center for International Community Health Studies (CICHS) at the University of Connecticut, Farmington, CT
- 1992-1996** *Health Educator*, Health Promotion and Prevention Program (HPPP), University of Puerto Rico, Mayagüez, Puerto Rico

HONORS

- Invited Plenary Speaker, American Association for Sex Therapists and Educators, 2018.
- Invited Panelist Speaker, Interdisciplinary Training Institute in Hispanic Drug Abuse funded by National Institute on Drug Abuse (NIDA), 2017.
- Invited Plenary Speaker, *Si Se Puede* Latino Social Workers Conference, Latino Social Workers Organization, Latino Adolescent and Family Health Center at New York University, and UNIVISION Contigo, 2016.
- Invited Lecture, Indiana University School of Public Health Dean's Research Seminar Series, 2014.
- Finalist, Presidential Award for Outstanding Teaching at Columbia University, 2008.
- Member, Board of Directors, Society for the Scientific Study of Sexuality (SSSS), 2007-2010.
- President, Society for the Scientific Study of Sexuality (SSSS), Eastern Region of the United States, December 2008 – November 2009.
- President, Society for the Scientific Study of Sexuality (SSSS) Eastern Region of the United States, December 2007 – November 2008.
- Best Abstract Submission – HIV Section, American Public Health Association Annual Meeting, Philadelphia, Pennsylvania, 2005.

- Center for International Community Health Studies scholarship, University of Connecticut, MPH Master Thesis: “Male-to-Male Sexuality and Sexual Risk Among Youth in Sri Lanka.”
- Doctoral Dissertation with Distinction, Department of Sociomedical Sciences, Mailman School of Public Health, Columbia University, New York, New York, 2001.
- Outstanding Dissertation, Marisa de Castro Benton Award, Mailman School of Public Health, New York, New York, 2001.
- Magna Cum Laude in Agricultural Sciences, University of Puerto Rico, Mayagüez, 1996.

TEACHING EXPERIENCE

Summary and highlights:

- Total students taught (as of December 2020): 1,828
- Number of MPH thesis sponsored: 57
- Number of doctoral dissertations: 22
- Number of doctoral dissertations as sponsor: 3

Provided academic leadership, curriculum innovation through the following positions:

- Infusion curriculum taskforce on substance use disorders training in social work, Temple University, Social Work, 2017-2019
- Competency mapping of social work student training taskforce, Temple University, Social Work, 2016-2018
- Macro-social work redevelopment taskforce, Temple University, Social Work, 2014-2017
- Director, Health Promotion MPH track, Mailman School of Public Health (MSPH), 2003-2006
- Director, Community Scholars fellowship program, MSPH, 2004-2008
- Director, Global Health track in sociomedical sciences, MSPH, 2006-2008
- Director, DrPH track in sociomedical sciences, MSPH, 2006-2011

City University of New York School of Medicine Courses (2019-2020)

Foundations of Epidemiology and Biostatistics (MED 22309)

This four-credits course is designed to introduce students to the topics of Epidemiology and Biostatistics. The course is split into two components: 1) Lecture/team-based learning and 2) SPSS Lab. Students will engage in independent learning outside of class through reading and video-based assignments. Lecture and Lab time will focus on the introduction to and application of concepts. Students will learn basic biostatistics computing skills using SPSS software package.

Semester	Role	Modality	Enrollment
Fall 2020	Co- Instructor	Online Synchronous	73

Introduction to Population Health and Community-Oriented Primary Care (MED 11209)

This is a three- credit introductory course that examines the complexity of determinants of health. It is designed to help students critically evaluate and apply their understanding of these determinants to develop strategies to improve the health of individuals and communities. First, we will consider theoretical and foundational concepts that are key to understanding community and population health, such as the meaning of health, the concept of community, the ways in which health problems are analyzed and framed, and how we study communities/populations and the health issues they face. We will then apply these concepts to specific health issues, including communicable and non- communicable diseases. Within each area, we will discuss the social, ecological, and biomedical aspects of health and illness. Within each topic, there will be a strong emphasis on identifying potential solutions (or “interventions”) to improve the health of individuals and populations. Through a socio-ecological framework and using a problem based interactive learning approach, students will begin to acquire, apply, and integrate the knowledge and skills required to understand, prevent, and improve current community health problems. This course employs lectures, small group activities, and discussions to characterize social influences on population health and community-oriented primary care, with an emphasis on the health of urban communities.

Social Work Courses at Temple University (2012-2019)

Individuals & Families (Human Behavior and the Social Environment: SSWG 5001)

This course is designed to explore the theoretical knowledge-base of social work in relation to human behavior and human development within the context of the social environment. Theories of human behavior are identified as undergirding the practice of social work. The course begins with an exploration of the role of human behavior theory, its limitations and strengths, and proceeds to draw from theories to provide knowledge of human development and human behavior throughout the life course from a person-in-environment perspective. The mutual influence of transactions between individuals, families, communities, social institutions and societies are explored using a social systems perspective. Interrelationships among biological, psychological, social and cultural systems as they affect and are affected by human behavior are studied using a number of interdisciplinary theoretical approaches.

Semester	Role	Modality	Enrollment
Spring 2019	Instructor	Online-Synchronous	12

Communities & Organizations (Human Behavior and the Social Environment: SSWU 3009)

This course is designed to help students better understand social service delivery within the context of human service organizations, communities and the societal environment. Organizational and community theories will be used to help beginning generalist practitioners interpret the context in which they will be working as direct service providers. Diverse structures, functions, dynamics, developmental models and theories of these system levels, including issues of power and empowerment, are studied and critically evaluated. Models of social, political, economic and cultural structures and functions across all systems will be the foundation of the course.

Semester	Role	Modality	Enrollment
Fall 2018	Instructor	In-person	21

Foundations of Human Behavior and the Social Environment (SSWU 3007)

This course is designed to explore the theoretical knowledge-base of social work in relation to human behavior and human development within the context of the social environment. Theories of human behavior are identified as undergirding the practice of social work. The course begins with an exploration of the role of human behavior theory, its limitations and strengths, and proceeds to draw from theories to provide knowledge of human development and human behavior throughout the life course from a person-in-environment perspective. The mutual influence of transactions between individuals, families, communities, social institutions and societies are explored using a social systems perspective. Interrelationships among biological, psychological, social and cultural systems as they affect and are affected by human behavior are studied using a number of interdisciplinary theoretical approaches.

Spring 2019	Instructor	In-person	11

Macro-evaluation research methods (SSW 8207)

This course is the advanced research course for the students in the Management and Planning and Communities and Policy Arenas Concentrations. This course will provide the history and philosophies, conceptual approaches, techniques and methods, and issues in practice and utilization of research applied to communities, organizations, social programs, and policies. It will also support learning that assists students to reach new insights and actions in order to contribute to how organizations and communities can make use of evaluation findings. It will focus on the skills to carry out research designed to support human rights through community and/or policy assessment, planning and intervention. Students will have opportunities for advanced exploration of community-based and planning research principles and practices. There will be a particular emphasis on critical understanding of the ways in which research can be oppressive and/or liberating.

Fall 2012	Instructor	In-Person	33

HBSE Health and Mental Health (SSW 8303)

This three-credit class, a required course for students pursuing a specialization in Health/Mental Health, focuses on Human Behavior in the Social Environment (HBSE) content relevant to health and mental health social work practice at all systems levels. Students will study the effects of bio-psycho-social- spiritual, familial, organizational, economic, and cultural variables on the definition, incidence, prevalence, experience, treatment, and prevention of chronic and acute conditions, particularly those prevalent among marginalized populations. Students will learn, critique, select and apply theories, knowledge, concepts, research, and skills to health and mental health issues for their program concentration. The course stresses the inter-relationship of physical and mental health and introduces students to alternative/additive health practices. **Role: Instructor**

Semester	Role	Modality	Expected Enrollment
Fall 2018	Instructor	In-Person	25

Societal Transformations (SSW 8831)

The purpose of this course is to identify and analyze significant political, economic and social trends and developments, and to determine their impact on the building of democratic societies. Various mediums will be used including works of fiction, biography, and nonfiction, films, and guest speakers. Emphasis is on understanding the factors that contribute to the pursuit of social change and attainment of social justice in local, national and international arenas. Attention is paid to the roles of individuals within transformational efforts, specifically the responsibilities of social work practitioners.

Institutional Racism (Writing Intensive) SSWU 3096

Designed to introduce and sensitize students to the forms, practices and effects of the ideology of racism, this course critically examines the historic and contemporary significance of race in American society. It begins with a brief mapping of race as a socially constructed concept and then turns to an investigation of stereotyping, prejudice and discrimination. Next, the focus is on the examination of various sociological theories of race and ethnic relations. Racialized oppression and stratification, as well as the deeply embedded structure of racialized inequality, constitute the focus of critical inquiry of the practices that perpetuate institutional systems that continue to limit the opportunities afforded to persons of color. Specifically, we will emphasize the role of institutional racism and its deleterious impact in arenas such as law, politics, religion, economics, education, health/mental health, employment, human services, housing, media, business and the prison industrial complex. The intricate interplay between racism and other institutionalized systems of oppression are also analyzed. The course then turns to an examination of the

current patterns of race inequality and color-blindness before concluding with a discussion of how race inequality might be eliminated.

Semester	Role	Modality	Enrollment
Fall 2017	Instructor	In-Person	19

Courses at Columbia University (2002-2012)

Multilevel Program Design (P8787)

Students in this course will learn and practice how to design a basic multi-level intervention. This course is specifically geared towards the topical and skill-related interests of students in the aging, global health, policy and ethics, research, sexuality, and, urban and the built environment tracks in sociomedical sciences.

Semester	Role	Modality	Enrollment
Spring 2011	Instructor	In-Person	75

Spring 2009	Instructor	In-Person	16
Spring 2008	Instructor	In-Person	43

Principles of Social Sciences and Public Health (P6700)

This course offers a broad overview of the theoretical foundations and empirically informed intervention strategies aimed at promoting the health of individuals, their families, workplaces and communities by taking a multi-level approach to the design of public health interventions. Using social and behavioral science theories, students in this course will examine how to address a range of health and social issues and develop basic health promotion initiatives for populations across the age spectrum (from children to elderly) in diverse settings globally. The overall goal of this course is for students to learn the conceptual tools and skills of prevention research and of multilevel health intervention design.

Semester	Role	Modality	Enrollment

Promoting Sexual Health (P8721)

The purpose of this course is to provide students with an introduction to the practical use of individual, interpersonal, organizational and community level theories in explaining and changing sexual and reproductive health behavior. Specific topics include theoretical foundations for the promotion of sexual health, including cognitive-behavioral, cultural and structural approaches; and the tension between population and community-based intervention strategies. The overall goal of this course is for students to learn how to apply theory to the practice of sexual health programming and how practice informs sexual health theory.

Semester	Role	Modality	Enrollment
Fall 2008	Instructor	In-Person	29

Advanced Qualitative Research Methods (P8785)

This course focuses on the principles and practices of designing, executing and using social science in public health using qualitative research methods (QRM). Principal research design concerns included in the course are: selecting a research topic; developing and clarifying specific research aims and purposes; selecting populations to be involved in the research; identifying audiences; assessing resources; nominating research outcomes and applications; project planning and data management; dissemination of findings. Key issues discussed include: capacities and objectives of qualitative social research; multi-

method research; and the relationship between difficult health problems and feasible research projects, including collaboration with affected communities.

Semester	Role	Modality	Enrollment
Fall 2008	Instructor	In-Person	9
Fall 2007	Co-Instructor	In-Person	15

Introduction to Global Health (P6810)

Many of the greatest challenges in public health are global. This course uses a multidisciplinary approach to discuss the major underlying determinants of poor health and the relationship between health and political, social, and economic development. Students will be introduced to the evolution of modern approaches to the setting of global health priorities, the functions and roles of the major institutional players in global health, and the funding of global health programs. The importance of strengthening health systems will be emphasized throughout. This foundation course for the Global Health Track introduces the major concepts and principles that govern the practice of global health, with an emphasis on resource-poor countries.

Semester	Role	Modality	Enrollment
Fall 2008	Co-Instructor	In-Person	44
Fall 2007	Co-Instructor	In-Person	56

Introduction to Sociomedical Sciences Research Methods (P8774)

This course provides an overview of the fundamental concepts and components of research methodology as used for social science investigation of public health issues. The focus of the course is to acquaint students with quantitative and qualitative research methods. Topics covered include: the appropriate use of qualitative and quantitative methods, research design, development of data collection instruments, data collection techniques, and data analysis. By practicing various parts of the research process, and implementing their own research project, students will gain an appreciation of all the components involved in sound public health research. Students who take this course may want to take other methods courses offered in SMS and other departments that build upon the techniques introduced in the course.

Semester	Role	Modality	Enrollment
Spring 2008	Co-Instructor	In-Person	62

Courses at Bard Prison Initiative in coordination with Bard College At Woodbourne Correctional Facility

Public health approaches to substance use disorders

There is an urgent need to increase the number of health and social service professionals with an expertise in empirically-supported alcohol and other substance use disorders identification and treatment methods. A severe substance use disorder is a chronic relapsing condition; thus, from a public health perspective, substance use disorders should be approached free of stigma and not that differently than other chronic conditions. This course will draw on principles of harm reduction, social justice, health equity to examine and learn tools for the prevention and treatment of substance use disorders (e.g., alcohol, opioids, stimulant dependence).

Spring 2019 (23 students) Role: Instructor

Masculinity and health

One of the strongest factors leading to young men's excess mortality globally is their notions of masculinity and the practices they engage to prove their masculinity or male privilege in patriarchal societies. When ideologies of hyper masculinity intersect with institutional racism, poverty and other forms of oppression and other forms of socio-economic exclusion, might increase risk-taking behaviors (including substance abuse, violence, self-harming practices) among young and adult. Ideologies of masculinity can also prevent adult and elderly men from identifying serious conditions (such as depression, diabetes, cancer), seeking care, or, adhering to treatments. This course will review theoretical frameworks and empirical evidence on the connections and causal relations between ideologies of masculinity, health seeking practices and health outcomes. It will focus on intersectionality and contextualizing findings using case studies multiple diseases

and conditions disproportionately affecting men in many contexts globally: HIV/AIDS, opioids, violence, diabetes, obesity, cardiac disease, trauma, depression, and alcohol use disorder.
Spring 2018 (7 students) Role: Instructor

Introduction to Public Health

Public Health is the science of preventing disease and promoting well-being among individuals in their communities from a population approach, using qualitative and quantitative research methods to examine the distribution of health and ill-health in society. Classically, the focus of public health has been on the analysis, surveillance and control of disease and illness, often infectious disease. More recently, it has shifted to the promotion of healthy behaviors, with the intent to prevent, rather than treat, disease. In the medieval period, public health efforts were epitomized by quarantine to prevent the spread of plague; in the 19th century, public health meant the promotion of the “sanitary movement,” providing clean water systems to prevent the spread of cholera. Since then, public health has been informed by advances in the clinical understanding of disease, statistical techniques to compare the risk of health disorders across sub-groups of populations, and social scientific approaches to understanding poverty and disadvantage. Today, public health explores social conditions on the local and global levels that contribute to ill-health. Its scope of work includes the distribution and impact of infectious diseases (HIV, Hepatitis-C) as well as other chronic conditions (diabetes, hypertension, asthma), and the social and environmental factors that sustain them. This course will provide a background and conceptual framework for understanding the history and scope of public health. It will take an inventory of the standard toolkit of public health, from epidemiological analyses of the distribution of diseases to social determinants of health. Finally, it will demonstrate how these analytic tools actually work through the use of case studies, primarily regarding health issues in New York City.

Spring 2011 (13 students) Role: Instructor

Intervention Design

Public health professionals regardless of their discipline must have a basic understanding of how multi-level public health interventions are designed and implemented. Through a foundational level of understanding of intervention design researchers will strengthen their ability to design studies that will translate findings into interventions at multiple levels. Evaluators and policy analysts increase their potential for designing most effective evaluation studies and to make sound decisions at the time of developing and recommending public health policies. Students in this course will learn and practice how to design a basic multi-level intervention.

Summer 2011 (19 students) Role: Instructor

Qualitative Research Methods

This course focuses on the principles and practices of designing and executing qualitative research methods in studying public problems. Specific methods will include field observation, key informant interviews, in-depth interviews, life history interviews and focus groups. Principal research design concerns included in the course are: selecting a research topic; developing and clarifying specific data collection aims, instrument development, implementation practices and management of narrative data.

Fall 2011 (8 students) Role: Instructor
